- National Telecommunication Institute

Bachelor of Mechatronics

September, 2011 - February, 2017

- Arab Academy For Science Technology and Maritime Transport

PROJECTS

Nejoum Systems || React js - Next js - Monorepo

[Visit](#) >

- Nejoum Systems is a unified internal platform built with React, Next.js, and a monorepo architecture, streamlining various business operations under one dashboard. It centralizes modules like Profit & Loss tracking, HR management, fines handling, and damaged car reporting. Designed for scalability and efficiency, it enables seamless navigation and maintenance across all internal tools.

NAJ Express || Vue Js

[Visit](#) >

- NAJ Express is a car shipment management platform spanning America, Korea, and Cambodia. I developed features for handling car details, dock receipts, load planning, and customer requests, as well as admin tools for approving load plans, setting loading dates, and assigning containers and tracking the shipment process from warehouse to customer.

Naj Auctions || Next Js

- Naj Auctions is a Next.js-powered website offering a comprehensive platform for users to participate in car auctions. It allows users to place bids, manage their profiles, and sell their own vehicles. With a user-friendly interface and secure transaction handling, Naj Auctions simplifies the auction process for both buyers and sellers in the automotive market

TenTen Operation Dashboard || React

- TenTen Pay is a **SaaS-based** fintech solution designed to streamline bill payments, financial transactions, and customer relationship management. The platform simplifies payments, making them faster, more efficient, and less confusing for businesses and individuals.
-

Fees Engine || React || Micro-Frontend

- The Fee Engine is a micro-frontend-based service designed to calculate transaction fees dynamically based on specific providers. This modular approach allows the engine to be integrated seamlessly across three different dashboards, ensuring consistent and efficient fee calculations tailored to various business needs

TenTen Pay Website || React || Next js

- Tenten Pay's website provides a comprehensive overview of the app's features, making it easy for users to understand its benefits. It also offers convenient options for app downloads and access to customer support for assistance.

Al Manea || Magento

- Al Manea is an e-commerce established in KSA and based on Magento
- In this project i developed the website to match XD and i also worked on some backend tasks

[Visit >](#)

Etmana || Angular

- In this project i worked on two phases, Magento 2 and Angular
- In Magento version I developed the website to match XD and i also kept maintaining the website
- In Angular version i worked on the website and admin , integrating APIs and designing the responsive design.

[Visit >](#)

Zegna || Magento

- Zegna is an ecommerce application based on Magento
- In this project i worked on customer account, cms pages, search behavior, popups and product catalog pages.

[Visit >](#)
